

VECTOR DESIGN LIMITED

Company Profile

Vector Design Limited (VECTOR) was incorporated in 1983 as a privately held limited liability company. VECTOR entered the Personal Computer market in its early growth stages and established itself as one of the more innovative companies at the time and being on record as the company that introduced CAD to Jamaica.

During the 1980's, VECTOR responded to the demands of its industry and was renowned as an IT corporate trainer for clients in the private and public sectors, and in the non-governmental and international organizations. Major clients included: Proctor & Gamble Interamericas, Revenue Board, National Trading Company, Ministry of Health, Pan American Health Organization, ALCAN and the National Library of Jamaica.

Vector Design provides high-quality services in the area of technology and conducts business consistent with internationally acceptable ethical business standards and practices. VECTOR is conveniently located in the business district of St. Andrew with offices at 35a Eastwood Park Road, Kingston 10.

Office at 35A Eastwood Park Road

VECTOR occupies approximately 5,000 sq. ft. of office space which houses its administrative offices and learning facilities. VECTOR's full-time staff complement comprises sales, engineers, administrative and ancillary staff.

Through its education arm (Vector Technology Institute), technical programs in networking technology are offered at the Certificate through to the Associate Degree levels. In addition, VTI is approved by The Fiber Optic Association and Electronics Technicians Association International Inc., to prepare, test and certify candidates for International Certification in Fiber Optic Installation and Testing.

Through local and international distribution channels, VECTOR retails computers, printers, computer parts and supplies for a number of manufacturers including Dell, Hewlett Packard, Canon, Okidata and Epson. As an OEM, VECTOR also markets its own brand of computers.

For over 15 years VECTOR has actively designed, installed and maintained premise networks for SMB, Campus and Corporate environments. Along with its global partners, VECTOR has the capabilities of providing quality products and services required for large scale network designs in both structured premise and OSP environments.

VECTOR is the local sales representative for Superior Essex, the largest OSP copper communications cable manufacturer in the world. Superior is also a leader in the design and manufacture of OSP Fiber Optic cables. Ongoing experience in copper and fiber systems guarantees that customers receive the effectiveness and reliability required for the support of next generation applications.

Vector is also the local sales representative for Leviton's Voice & Data division providing Premise LAN connectivity solutions. Leviton Voice & Data is focused on creating the next-generation products and manufacturing

technologies that will bring the benefits of high-speed communications connectivity within the reach of every potential end-user. With the appointments from Superior Essex and Leviton Voice & Data, Vector can supply Hi-Performance network infrastructure solutions for medium to large enterprises. These solutions provide the capacity required to reliably handle new Next Generation services.

VECTOR plays a pivotal role in assisting both Superior Essex and Leviton to develop and implement appropriate strategies to effectively serve its customers and expand its customer base in Jamaica. By providing communications cables from Superior Essex, and connectivity components from Leviton, customers will enjoy a tuned communications infrastructure that is guaranteed to provide the performance levels demanded of next-generation networks.
